

5TH NATIONAL COMPLEX REGIONAL PAIN SYNDROME CONFERENCE Wednesday 18th – Friday 20th May 2011 The Royal National Hospital for Rheumatic Diseases, Bath, UK

We are proud to announce the return of the popular Bath CRPS conference.

Topics this year include

- New CRPS UK diagnosis, referral and treatment guidelines
- Motor control and activation
- Sensorimotor integration
- Central processing and body perception disturbance
- Mirror visual feedback
- Graded exposure therapy
- Desensitisation intervention
- Motor imagery programme

- Psychological approaches
- Acceptance and Commitment Therapy (ACT)
- CRPS motor dysfunction
- Patient experience of living with CRPS

Speakers include

Professor Herta Flor
Professor Candy McCabe
Professor Jacobus van Hilten
Professor Catherine Mercier
Dr Lance McCracken
Dr Andreas Goebel

This innovative conference format provides the opportunity for delegates to attend all three days which includes a specialist scientific day or two days that focus on practical tools and education in the assessment and treatment of CRPS.

Scientific advances 18th May 2011

This day focuses on basic and clinical scientific advances in the field of CRPS. International experts present their latest research covering brain imaging, central integration, peripheral mechanisms, psychological aspects and motor control.

Assessment and treatment of CRPS 19th & 20th May 2011

Potential causes of CRPS and theory underpinning treatment interventions are discussed. Interactive workshops provide practical strategies on treatment interventions that may be used immediately in daily practice.

Full three day conference registration £300

18th May £140

19th & 20th May £160
